Word Problems Center

Grab a word problem card.

Read the problem and solve it.

Write the answer in the circle with the number that matches the card.

Word Problems Center

Teacher Directions:

Give students the 12 word problem cards and the recording sheet. Students will read each card, solve the problem, and then write their answer in the circle on the recording sheet that has the same number next to it as is on the word problem card.

Each card has a picture related to the word problem to help students sound out words they may have trouble with such as popsicle or banana.

For students who need extra assistance, provide a piece of scratch paper to draw the problems (or they can use the back of their recording sheet). You can also provide manipulatives for them to count with or a number line.

1

We got a box of 20 popsicles. We ate 10 of them. How many popsicles are left?

2

There are 15 kids skating. 3 kids go home. How many kids are still skating?

3
